

## **CURRICULUM NEWSLETTER**

**Animal Science 067**  
**December 7, 2007**

TO: Students/Faculty

FROM: Dr. Jim Wohlt, Undergraduate Program Director  
Phone: 732-932-9454; email: [wohlt@aesop.rutgers.edu](mailto:wohlt@aesop.rutgers.edu)  
Department homepage: <http://animalsciences.rutgers.edu/>

### **INFORMATION YOU NEED**

This newsletter and the Animal Science web site (<http://animalsciences.rutgers.edu/undergraduate/ug-curriculum.html>) contain the latest information concerning registration, 067 course offerings, 067 course synopses, recommended sequence of courses, and an archive of previous curriculum newsletters. Use this information in conjunction with your advisor to develop your program and achieve your career goal.

### **NEW 067 COURSES: REGISTRATION FOR SPRING 2008 NOW POSSIBLE FOR**

Two new Animal Science courses now appear on the Spring 2008 Schedule of Classes. Information on the courses is presented below.

#### **Companion Animal Science 11:067:250, 3 credits**

Open to Class 2010 and 2011, or by permission of instructor.  
T3F3, 12:35-1:55 pm; Bartlett 123; no prerequisite

The course, taught by Dr. Katz, will provide: a) an understanding and appreciation for the human-animal bond and for the responsibilities of animal ownership in current society; b) nature of domestication, anatomy, behavior, physiology, nutrition, health, and diseases of companion animals; and c) opportunities and responsibilities of animal-oriented careers. This course serves as an elective.

#### **Advanced Equine Health Care and Management 11:067:398, 3 credits**

M7W7, 7:15-8:35 pm; Bartlett 123; Prerequisite: 11:067:384 or permission of instructor

The course will be taught by Dr. Michael Fugaro ([fugarom@centenarycollege.edu](mailto:fugarom@centenarycollege.edu)) and utilize a systems based approach to common medical conditions and ailments affecting the horse. The foundations of anatomy and physiology are reinforced while presenting clinical situations observed in the horse. This course serves as an elective within the curriculum. The course is taught each spring semester but location will alternate by year (Rutgers: 2008, 2010, etc.; Centenary College: 2009, 2011, etc.). When the course is taught at Centenary College enrollment for Rutgers students will be limited. Plan accordingly. Prerequisite override and special permission must be obtained from Dr. Fugaro.

### **INFORMATION ON ANIMAL HANDLING FITTING EXHIBITION, 11:067:175**

This course is conducted between spring break and Ag Field Day 2008. You will be contacted around spring break to attend meetings that will provide course information/requirements.

### **ANIMAL PHYSIOLOGY LABORATORY OFFERED AS AN ELECTIVE SPRING 2008**

Dr. Advis will offer this laboratory (11:067:301, 1 credit). Animal Physiology 11:067:300 is a pre- or co-requisite. This laboratory is not required but will serve as an elective providing the opportunity for a stronger background and understanding of physiological principles.
